Create App Service Plan

BasicsTagsReview + create

App Service plans give you the flexibility to allocate specific apps to a given set of resources and further optimize your Azure resource utilization. This way, if you want to save money on your testing environment you can share a plan across multiple apps. [Learn more](#)

Project Details

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

The screenshot displays a GitHub Actions workflow run for the repository 'shreyatiwari1311-lgtm / appServiceNode'. The workflow is titled 'Add or update the Azure App Service build and deployment workflow config #1' and is in a 'Success' state. The summary section shows two jobs: 'build' and 'deploy', both of which are successful. The workflow steps are 'build' (10s) and 'deploy' (24s). The interface includes a sidebar with navigation links like Code, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. The bottom of the image shows a Windows taskbar with various application icons and system information.
